SKILLS

Languages

TypeScript, JavaScript, Python, Kotlin, SQL, PowerShell

Back end and data

Node.js, Express, REST API, WebSocket, PostgreSQL, SQLite

Front end and mobile

React, Next.js, Android, Jetpack Compose

DevOps

Linux, Docker, Nginx, PM2, GitHub Actions, Cloudflare

AI

Claude Code, Anthropic API, RAG, MCP server, Agents

Support

TeamViewer, AnyDesk, Ticketing, PC repair

LANGUAGES

French : native
English : B1 (TOEIC 715)

INTERESTS

Karting
Science
Bowling

SUMMARY

I graduated in 2022 with a professional bachelor's degree in advanced programming and kept developing alongside my jobs. I design and maintain, on my own, production tools for a multiplayer web game, supervised by an AI agent workflow I built. I am now looking to join a team.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — 2022 - Present

Independent projects - Remote

Bots and tools from 2022 to 2025, then the Magic Garden ecosystem, a multiplayer web game

- Built the game's mod in TypeScript, on PC, mobile and Discord, over 50 features, about 700 players a day
- Developed a public API for the game (Node.js, Express, SQLite, SSE), over 200 automated tests
- Designed a real-time back end (Node.js, PostgreSQL, WebSocket), load cut from 5 million to 900,000 requests a day
- Released an Android app (Kotlin, Compose), 69 releases, about 11,200 downloads

AI-assisted supervision and maintenance — 2025 - Present

Independent projects - Remote

Player support since the mod's launch in 2025, supervision by AI agents since 09/2026

- Built a workflow of AI agents specialized for each project, the mod, the API and the Android app
- Monitored the API every 5 minutes, with guarded self-repair and automatic rollback
- Automated bug report triage with AI, a fix only when a test fails first, 27 of the first 34 fixed
- Built a conversational supervisor (custom MCP server), every release approved by me
- Provided player support and moderation, with a bug report built into the mod and the app

Work-study Software Developer — 10/2021 - 09/2022

Burographic - Anglet, France

7-employee company, 2-person IT department, developer and technician

- Co-developed BuroSNMP, monitoring about a hundred copiers: gathered the needs and built the Python client (SNMP)
- Provided remote customer support (phone, TeamViewer, AnyDesk) through ticketing, at least 3 tickets a day
- Diagnosed and repaired PCs and copiers in the workshop and on site, including data recovery
- Automated tasks with Excel VBA macros and PowerShell and Batch scripts

OTHER EXPERIENCE

2026 - Present	Fresh food department employee, E.Leclerc, Metz, France
2024 - 2025	Temporary and seasonal work, Samsic and other agencies, southwest France

EDUCATION

2021 - 2022 — **Professional Bachelor's, Advanced Programming**
IUT de Bayonne, France, work-study

2019 - 2021 — **Two-year Computer Science Degree (DUT)**
IUT de Bayonne, France
